**TITLE:** Image processing method for color printing onto e.g. fabric, involves assessing color dot coverage and applying compensation calculations by application of frequency modulation screening

### Basic Abstract Text (1):

NOVELTY - A scanned color image is transferred onto paper and printed onto a sample fabric for assessment of color quality based on color dot coverage. Results are compared to calibrated measurements and amendments to the image data file are applied based on a color separation frequency modulation (FM) screening technique that uses a compensation curve.

PF Application Date (1):

20010308

PF Application Date (2):

20010308

Standard Title Terms (1):

IMAGE PROCESS METHOD PRINT FABRIC ASSESS DOT COVER APPLY COMPENSATE CALCULATE APPLY FREQUENCY MODULATE SCREEN
